REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: As per claims 1-23, in particular claims 1, 11, and 18, prior art of record does not teach or further suggest a digital signature method or a system wherein a viewer program is subjected to a hash function and digital signature operation on a converted document. The inclusion of the viewer program in the hashing and digital signing process enables the documents visual integrity to be maintained, while also maintaining the document data's security against would be hackers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,210,795 (Lipner et al.) discloses a method for protecting a floppy disk with login software from unauthorized use.

U.S. Patent No. 6,301,660 (Benson) discloses a computer system and method for protecting a file wherein before encrypting, computing message digests, and computing signatures, the translator may modify the UF file in a manner that hides special semantics of the UF file.

U.S. Patent No. 6,393,566 (Levine) discloses a time-stamp service for the national information network wherein one of its features is the elimination of control codes, which might be placed into a clear text document through a word processor.

Art Unit: 2136

U.S. Patent No. 6,681,329 (Fetkovich et al.) discloses a system or method for performing integrity checking of a relocated executable module loaded within memory by an operating system loader.
